

To whom it may concern,

It has come to my attention that the National Association of Broadcasters (NAB) is pressuring the FCC to ban XM Satellite Radio from broadcasting local traffic and weather. I understand that petition 04-160 is the NAB's attempt to stifle the competition of satellite radio. I urge the FCC to REJECT petition 04-160 as it is the consumer who should make the decision on satellite radio, not the NAB.

Sincerely,
Gregory Johnston
Rockport, MA
